Email: 123www123aaa@gmail.com

Summary

Ambitious and detail-oriented Electrical Power and Machines Engineering graduate with excellent academic standing and strong specialization in **electrical power and machines, with practical experience in electrical infrastructure, medium-voltage networks, building electrical works, MEP-related electrical systems, power layouts, and light current systems** in compliance with international standards, using advanced tools such as **AutoCAD, Dialux Evo, ETAP,and Revit**.

Education

- **Bachelor of Electrical Power and Machines Engineering**

  Institute: Mansoura University, Faculty of Engineering, Egypt. Oct 2020-Jun 2025

  Overall Grade: Excellent.
- **Graduation Project**

  Smart Battery Management System for E-Mobility.

  Grade: Excellent.

Professional Experience

- **Al Gammal Company – Libya** Nov 2025-Now

  Electrical Engineer | Misrata International Airport Site
  - Worked on electrical infrastructure and Medium Voltage (MV) network works at Misrata International Airport.
  - Worked on MEP electrical works for airport buildings and associated facilities.
  - Participated in electrical works for firefighting stations, water desalination and water treatment plants.
  - Worked on CCTV and security systems as part of low-current works.
  - Worked on Fiber Optic infrastructure and related communication systems.
  - Worked on parking area and external lighting installations.
  - Worked on road lighting and street lighting systems.
  - Coordinated electrical works with MEP, infrastructure, building, and utility activities on site.
- **Al Abd Company – Egypt** Jun 2025-Nov2025

  Electrical Site Engineer | Al Hay Al Akhdar Project, Obour City
  - Participated in electrical distribution and power systems for residential and commercial facilities.
  - Coordinated electrical works with building construction and MEP activities.
  - Reviewed electrical drawings and followed site requirements and installation activities.

Courses

- **Distribution Diploma (Design-Technical Office -Implementation -Tendering) for Electrical Works at Eduneers Company** Nov 2024-feb 2025
  - Independently carry out lighting system designs for indoor applications using Dialux Evo.
  - Implementing small power and MEP loads, Design layouts following international codes.
  - Prepare single-line diagrams and riser diagrams for electrical distribution panels.
  - Sizing LV transformers, generators, UPS, and central batteries according to calculated demand loads.
  - Voltage drop and short circuit calculations using Ecodial and Etab.
  - Design light current systems such as fire alarm, data, telephone, CCTV, access control, IP, TV.
  - Earthing Systems .
  - Design and shop drawing using Revit (Currently In Progress).
  - KNX & BMS (Currently In Progress).
- **Classic Control at HA** Jun 2023
- **Basic PLC Programming at HA** Jun-Jul2023
- **Electrical Motor Drive Programming at HA** Aug 2023

Technical and Personal Skills

- AutoCAD.
- ETAB.
- Simulink MATLAB.
- DIALux Evo.
- Microsoft Office (Word, Excel and PowerPoint).
- Revit (in progress).

Personal Skills

- Technical Documentation — Able to produce clear, professional reports, single-line diagrams, riser diagrams, and shop drawings.
- Time Management & Responsibility — Ability to handle multiple tasks, meet deadlines, and take ownership of design and project responsibilities.
- Teamwork & Communication — Effective collaborator with excellent written and verbal communication skills, fostering productive teamwork in engineering environments.

Languages

- Arabic – Native Language
- English – (Reading & Writing) Excellent | (Listening & Speaking) Very Good
